

10 things parents need to know about Invisalign Teen®

✓ What is Invisalign Teen?

Invisalign Teen is the virtually invisible way to straighten your teen's teeth. Invisalign uses a series of clear, removable aligners that have been custom-made for your teen's teeth. Your teen simply wears them over their teeth and changes them out for a new set of aligners every two weeks. Little by little, your teen's teeth gradually shift into place, achieving that confident smile.

✓ What are some of the practical advantages of Invisalign?

If you've had braces yourself, you already know the issues associated with metal wires and brackets. With Invisalign, the aligners are removable, so your teen can play sports without the worry of being hit in the mouth by a ball, which can cause real damage in braces. They can also continue playing musical instruments properly, without getting in the way. With Invisalign, there are no such restrictions. The removable aligners make it easy to brush and floss normally to maintain proper oral hygiene.

✓ Are there any emotional concerns to consider?

Research shows that mums underestimate the extent to which teens feel self-conscious about crooked teeth. With Invisalign Teen, no one needs to know your teen is straightening their teeth, removing a potential source of real anxiety for them and giving them the confidence to be themselves in front of everyone.

✓ How long does Invisalign Teen treatment take?

The actual length of your teen's treatment depends on the severity of their condition and can only be determined by your orthodontist.

✓ Does my teen have to wear Invisalign all the time?

Invisalign Teen is most effective when worn 20 to 22 hours per day and changed every two weeks. Clinical study data show that teens wear their aligners on average for just under 21 hours per day, exactly as recommended. Plus, Invisalign Teen has a built-in assurance check; each aligner has blue indicators that fade over time when used as directed, so the orthodontist can track compliance.

✓ How much time will be spent visiting the orthodontist?

There are no adjustments to make, no broken wires to fix. After the initial appointment, follow-up appointments are usually scheduled for every four to six weeks.

✓ Is Invisalign effective?

Invisalign can effectively treat mild to severe cases, including underbite, overbite, overcrowding and gaps between teeth. The chances are very high your teen will be a great candidate for Invisalign.

✓ What happens if an aligner gets lost?

Not to worry - Invisalign Teen offers six replacement aligners for free! In the event that an aligner is lost, you should inform your orthodontist right away.

✓ Who is eligible for Invisalign Teen?

Invisalign can be used for teens who have erupting or erupted permanent dentition—this includes most teenagers. A trained Invisalign orthodontist should evaluate your teen's specific dental issues to determine candidacy. If the orthodontist rejects your teen as a candidate, it is advisable to seek a second opinion, as each provider has a different level of experience treating with Invisalign.

✓ How much does Invisalign cost?

Costs for orthodontic treatment can vary with geography and with the complexity of treatment – see an Invisalign-trained orthodontist for full details. Also, check your dental insurance plan—orthodontic treatment with Invisalign Teen is covered by many dental insurance policies. And many orthodontists can offer flexible and affordable monthly payment plans as well.
